

Product Data Sheet

ISO-Cable Lubricant Gel Type N

Description:

ISO-Cable Lubricant Gel Type N is an additive especially for underground cable installation. The lubricant reduces the friction during the installation process and is particularly suitable for plastic-high-power current cable. ISO-Cable Lubricant Gel Type N is enabled by many electricity supplier and Deutsche Telekom.

ISO-Cable Lubricant Gel Type N does not contain organic aromatic or halogenated substances and 100 % biodegradable.

Application:

- Power cable installation
- Communication cable installation

Properties:

- Effective lubricant
- Low vapour pressure
- High flash point
- Removable by water

Please see material safety data sheet for additional information.

Our technical advice - whether verbal, in writing or by way of trials - is given in good faith but without warranty, and this also applies where proprietary rights of third parties are involved. It does not release you from the obligation to test the products supplied by us as to their suitability for the intended processes and uses. The application, use and processing of the products are beyond our control and therefore entirely your own responsibility. Should, in spite of this, liability be established for any damage, it will be limited to the value of the goods delivered by us and used by you. Of course we will provide products of consistent quality within the scope of our General Conditions of Sale and Delivery.
